HOW TO PLAY

Each player is given a secret goal card of one of the five colored dragons: red, gold, green, blue, and black. The cards are played on the table connected like dominoes, with each player trying to win by connecting seven panels of their dragon. Action cards allow players to shake up the action in five different ways, and the wild and silver dragons bring strategy to the table.

- Original paintings by Larry Elmore, the original Dungeons & Dragons artist.
- Gameplay similar to our card game Aquarius, but with increased strategy.
- One of three games coming out of the vault after years due to strong demand.
- Order six games and get a FREE countertop display!
