HOW TO PLAY

Zendo is an inductive logic game in which players compete to be the first to figure out a secret rule chosen by a neutral moderator. Players take turns building new structures of game pieces, each of which will be marked by the moderator as to whether they follow the rule or not. By observing the patterns of which structures follow the rule or not, and testing their guesses, players narrow down the possibilities until someone guesses the rule exactly!

- Eye-catching crystalline pieces and clean abstract design draw customer interest
- Easy to set up a casual drop-in demo game display
- Adaptable for cooperative play with larger groups
- Forty rule cards with multiple specifying factors creates hundreds of possible rules and endless replayability
- Great teaching tool for home-schoolers or classrooms
